PROFILE

MSc Robotics student at Heriot-Watt University with over 3 years of software development experience designing scalable backend systems, RESTful APIs, database architectures, and cloud-based applications. Proficient in JavaScript, TypeScript, Python, SQL, and modern backend frameworks. Experienced in building production-ready systems, real-time embedded applications, and data-driven software solutions. Strong analytical, debugging, and system design skills with a passion for building reliable and efficient software systems.

EDUCATION

Heriot-Watt University – Edinburgh, Scotland

Jan 2026 – present

Msc, Robotics

Relevant coursework

- Machine vision
- Embedded software
- Research and technical documentation

Joseph Sarwan Tarka University – Makurdi, Nigeria

Jan 2016 – Jun 2023

B.eng, Mechanical Engineering - First class honors

Relevant coursework

- Computer programming
- Statistical analysis
- Engineering Design
- Technical reporting

WORK EXPERIENCE

Backend Software Developer and Team Lead

Aug 2025 - Mar 2026

EveryGrad Ltd - Nigeria – Makurdi, Nigeria

- Led backend development for database-driven web applications.
- Designed scalable API architecture using **Django python**.
- Managed code reviews, Git workflows, and technical documentation.
- Collaborated with frontend developers and product stakeholders.
- Supported deployment, monitoring, and production maintenance.

Backend Software Developer

Jan 2025 - Jan 2026

Acepick Networking company Ltd – Nigeria

- Designed and developed scalable backend services using **Node.js** and relational databases.
- Built RESTful APIs for data storage, retrieval, authentication, and business workflows.
- Optimised SQL queries and database schemas for performance and scalability.
- Managed cloud-hosted infrastructure and ensured system reliability.
- Debugged production issues and improved application performance.

Fullstack developer

Jan 2024 - Dec 2025

JIT Solutions Ltd – Ondo, Nigeria

- Led backend development for a database-driven mobile application serving 2,000+ active users.
- Designed and implemented scalable **RESTful APIs** using **PHP** and **Laravel**, enabling secure and efficient data exchange across mobile and backend services.
- Architected and optimized relational database schemas, improving data integrity, query efficiency, and system scalability.

- Managed code reviews, **Git-based** development workflows, and technical documentation to maintain code quality and team productivity.

PROJECTS

Backend Software Developer and Team Lead Aug 2025 - Sept 2025

Tastetorial - Video sharing app

- Led coordination between frontend and backend teams using collaboration and project management tools such as Notion and Google Meet.
- Designed and developed scalable backend APIs using Node.js, TypeScript, and Sequelize ORM.
- Managed code reviews, Git workflows, and technical documentation to support collaborative development.
- Supported deployment and maintenance of the application on the Microsoft Azure cloud platform.

VOLUNTEER ACTIVITIES

Tutor and Mentor, JIT Solutions Ltd Jan 2024 - Dec 2024

- Mentored 30+ students in programming and digital skills
- Delivered technical training sessions and project support

SKILLS

HTML and CSS	MySQL	Excel
JavaScript	PostgreSQL	Google sheets
Node.js	Sequelize ORM	Microsoft Power BI
Express.js	Git & GitHub	Python
Django	Docker	
Laravel	Azure	
REST APIs		

CERTIFICATES

Python programming - ALX africa	Data analysis - ALX africa
